

Sinclair Broadcast Group uses the public airwaves free of charge, and is obligated by law to serve the public interest. One-sided documentaries designed to sway the election to suit Sinclair's agenda does not serve the public well or at all! To do so destroys your reputation as a legitimate source of information. Instead of news and commentary produced at "News Central" far away, it's more important that we see real people from our own communities and more substantive news about issues that matter on TV. One of your own polls shows that 68% of those people taking the time to come to one of your station's website and take the poll, do NOT think that you should show this negative, political advertisement, and most especially in the guise of "legitimate" "News?????" I hope common sense, decency, ethics, and public opinion will affect your decision and you will not air this on the PUBLIC airwaves under your stations auspices.
